

Expandable Downdraft Cutting Tables... Breathe Easy.

- Superior smoke removal for improved operator safety
- Dramatically reduced downtime for increased productivity
- Maintenance-free, modular components for unmatched cost efficiency
- Fully customizable systems for any size and application

VeriCUT Downdraft Cutting Tables

The Difference Is Clear.

All VeriCUT Downdraft Cutting Tables are precision engineered to meet the most demanding applications in oxy-acetylene and plasma cutting environments.

Truly Superior Smoke & Dust Removal

- More efficient extraction of smoke, fumes and dust
- Improved employee health, longer service life for electronics and components
- Air ducts 40% larger capacity than standard
- Zone-by-zone ducting design reduces air make-up costs
- No internal flanges to obstruct flow
- Laser-cut, precision-fitted duct doors operate under own weight
- Higher dust recovery rates
- Less expensive dust collection system required

Customizable and Expandable

- Custom design/build, from 4' x 4' tables, to 20' x 100', to virtually any size
- Many unique optional features available (e.g.: under-the-table hidden caterpillar tracks for tight spaces)
- Retrofit available for existing installations
- Inexpensive future expansion with bolt-in-place, fully-contained table modules
- More cost-effective than competitive or in-house table manufacturing

Reliable, Cost-effective Operation

- Built for long, dependable service with lower operating costs
- Mechanical zone activation – no expensive electronics, hydraulics or pneumatics
- Removable slag trays reduce maintenance downtime by up to 400%
- Optional side-mount walkways for easier material loading and unloading
- Heavy-duty bearings and mechanical components with off-the-shelf interchangeability

The Complete System

- On-site set up and testing by certified installers
- Supply and installation of industry grade ductwork from table to dust collector
- Assistance with environmental certification for complete system
- “Pre-Start” system inspections
